NCS SYSTEMS

**designs customized
cases based on
customer
specifications**

KEY POINTS

1.

Custom Design

NCS SYSTEMS **designs**
according to your specific
needs.

2.

Consolidated Design Phase

Collaborative study to
develop a prototype that
meets your specifications

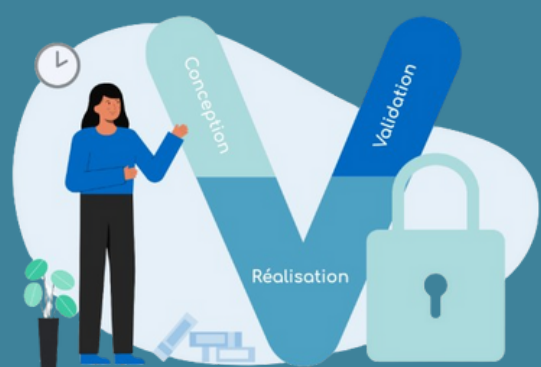

3.

Series Production

We support you throughout
the entire product
industrialization phase.

Full V-Cycle Intervention

NCS

SYSTEMS

is involved in the entire V-cycle: from requirement analysis to specification, general design, implementation, testing phases, validation, and maintenance.

Use Case

Protect your environment with a mobile control station, ready to be deployed in complex operational theaters for **drone interception, piloting**, or other critical missions
